

NTHU Invests According to the Principles of Social Responsibility and Sustainability: A Statement

NTHU's Endowment Fund is managed conservatively. We invest in stocks and Exchange-Traded Funds with stable profits and prioritize the selection of sustainable and socially responsible enterprises.

The investment management team reviews the Social Responsibility Reports issued by companies and also takes three major international ESG indexes, i.e., the FTSE ESG Index, the Dow Jones Sustainability Index, and the MSCI ESG Index, into consideration in the selection of investment targets. The management team also considers the environmental, social, and governance risk factors with the same weight as other material risk factors in its implementation of the Principles for Responsible Investment (PRI).

Che-Chun Lin

Vice President for Alumni Service and Resources Development
